Professional Summary

Flutter Mobile Developer with 4+ years of experience building high-performance cross-platform applications for Android and iOS. Proficient in Clean Architecture, MVVM, BLoC, and Riverpod, with a strong focus on scalable and maintainable codebases.

Experienced in integrating Firebase, RESTful, and GraphQL APIs, and implementing CI/ CD pipelines using Fastlane and Flavors. Successfully delivered 10+ production apps published on Google Play and App Store across e-commerce, HR, and community service domains.

Education

HIMIT Bachelor's Computer Science , Very good	09/2019 – 06/2023 Kafr-Elshaikh
---	------------------------------------

Professional Experience

Breem Sr.flutter developer	06/2025 – present Tanta - Part time
---	--

Led the development of +4 **cross-platform Flutter applications** across various industries including **e-commerce, transportation, and on-demand services**. Drove architecture decisions, implemented scalable solutions, and improved application performance and maintainability

Software Vision Mid-Level Flutter Developer	10/2022 – 01/2024 Cairo
--	----------------------------

Developed and maintained mobile apps for Android and iOS using Flutter.
Integrated **4+ third-party services** including payment gateways, push notifications, and Google Maps

Radiant-Coders Mid-level Flutter developer	02/2022 – 10/2022 remotely
---	-------------------------------

Delivered 1 full Flutter app from scratch and contributed to 3+ existing apps through feature additions, UI improvements, and bug fixes
Collaborated remotely with cross-functional teams using Agile/Scrum, Git, Jira, and Slack across the full development lifecycle

Deltana-it Junior Flutter Developer	03/2021 – 02/2022 Mansoura
--	-------------------------------

Built 3 core modules from scratch (appointment booking, patient records, push notifications) for an internal healthcare app as part of a cross-functional team
Migrated codebase from setState to Provider with Clean Architecture, improving performance and significantly reducing time needed for bug fixes and future updates

Devest Junior Flutter Developer	06/2020 – 01/2021 Mansoura
--	-------------------------------

Built multiple Flutter apps covering layouts, navigation, and REST API integration
Gained practical experience in Flutter and Dart across real app development scenarios

Projects

Waddini IQ
Redesigned UI from scratch and refactored codebase, improving performance by **~60%** and reducing Maps API costs
Google play  | **App Store** 

EDUS

Implemented advanced app security features including screen recording prevention, emulator detection, and video playback restriction. Added MFA authentication and biometric login to enhance user account protection

Google play [↗](#) | App Store [↗](#)

Karwa Taxi App

Collaborated with Mowasalat (Karwa) team — Qatar's official transport provider — to deliver a taxi booking app with **250K+ downloads**

Google play [↗](#) / App Store [↗](#)

Qarib – Food Delivery

food delivery app with real-time tracking, payment integration, and scalable architecture using Bloc, Freezed, and dependency injection.

Google play [↗](#) | App store [↗](#)

Azkar Elmuslim

A spiritual guide app featuring prayers, Hadiths, and a digital tasbih.

GooglePlay [↗](#) | AppStore [↗](#)

First Wash

Provides car services like washing and polishing through a user-friendly app.

Google play [↗](#) | AppStore [↗](#)

Maharat TfL

Helps children improve speech and social skills through interactive exercises.

Google play [↗](#) | App Store [↗](#)

Al-Dafoor

Al Dafoor is an interactive app that tests users’ knowledge across science, math, and language.

Google Play [↗](#) | App Store [↗](#)

Ahal | أهل

A community app for NHC residents to access housing services and submit maintenance requests.

GooglePlay [↗](#)

Skills

Mobile Frameworks: Flutter, Android , Ios	State Management: Bloc, Provider, GetX, Riverpod.
Backend Integration: RESTful APIs,Dio,Https, Firebase, socket.io , pusher	Architecture Patterns: MVVM, MVC, SOLID Principles, Clean Architecture
Testing: Unit Testing, Widget Testing, Mockito.	Database: Secure Storage , SharedPreferences, Hive,firebase storage
Integrations : Push Notifications, Google Maps, payment Gateways, shorebird	Version Control: Git
CI/CD: GitHub Actions, Fastlane.	Tools: GitHub / GitLab
Dependency Injection: get_it, injectable	Code Generation: Freezed, JsonSerializable

Languages

Arabic <i>native</i>	English b2
